PROFESSIONAL SUMMARY

Software engineer with 13+ years designing and building scalable web, backend, and mobile applications. Experienced across the full development lifecycle with TypeScript, Python, React, Next.js, FastAPI, Node.js, and NestJS. Proven track record shipping enterprise logistics platforms, microservices, and cloud-native applications deployed on Kubernetes. As CTO of GOSG Consulting, now building a high-scale e-commerce platform and tooling suite with autonomous AI agent workflows integrated throughout. Strong advocate for clean architecture, code quality, and collaborative engineering.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
Frontend:	React, Next.js, React Native
Backend:	FastAPI, Node.js, NestJS, REST APIs, gRPC, Microservices
CMS:	WordPress, Shopify
Platform & AI:	Website Builders, E-commerce Systems, SEO Tooling, Autonomous AI Agent Workflows
Infrastructure:	Kubernetes, Git, CI/CD, Docker, Linux VPS, Nginx, Caddy
Databases:	PostgreSQL, MySQL, SQLite
Practices:	API Integration, Code Review, Agile Development, Software Architecture, TDD

PROFESSIONAL EXPERIENCE

CTO | *GOSG Consulting* Aug 2024 – Jul 2026

- Architects and leads development for high-scale commercial e-commerce platforms using Medusa, Next.js App Router, and FastAPI monorepos.
- Leads client SEO strategy and technical execution, while designing proprietary in-house SEO tooling to automate audit, ranking, and content workflows.
- Engineers autonomous AI agent pipelines with deterministic verification gates, custom tool integrations, and background task dispatch for content, audits, and operational workflows.
- Enforces rigorous engineering standards — RED-GREEN-REFACTOR TDD, zero-trust PR review workflows, and automated lint/typecheck/test CI pipelines across both frontend and backend.
- Designs resilient server and deployment infrastructure on self-hosted Linux VPS environments using Nginx, systemd service daemons, and Caddy reverse proxies.
- Mentors engineering talent, guides architectural spikes, and translates complex business requirements into maintainable, production-ready full-stack software.

Tech Stack: *Medusa • Next.js • FastAPI • TypeScript • Python • SEO Tools • PostgreSQL • AI Agents*

Software Engineer | *pickupp (Singapore)* Apr 2019 – Jul 2024

- Developed and maintained enterprise logistics platforms using React, Next.js, Node.js, and NestJS.
- Built scalable backend microservices in TypeScript communicating through gRPC.
- Integrated UPS shipping APIs to expand merchant delivery options and pricing capabilities.
- Contributed to Merchant Portal, Admin Portal, Fleet Portal, Landing Page, User App, and Delivery Agent App.
- Participated in code reviews, improving maintainability and engineering quality.
- Deployed and maintained services in Kubernetes environments to support scalable production workloads.

Tech Stack: *React • Next.js • Node.js • NestJS • TypeScript • JavaScript • Kubernetes • gRPC*

PROFESSIONAL EXPERIENCE (CONTINUED)

Full-Stack Developer | *WebDesignHamburg.net* May 2018 – Apr 2019

- Developed and maintained custom web applications for international clients across diverse business domains.
- Implemented full-stack features using modern JavaScript frameworks and backend REST APIs.
- Delivered responsive, accessible, and maintainable web solutions with automated build pipelines.

Senior Web Application Developer | *Incuvius* Sep 2013 – May 2018

- Architected and developed custom web applications, resolving complex architectural and technical bottlenecks.
- Maintained high-traffic production applications while engineering new feature modules and third-party integrations.
- Collaborated directly with cross-functional stakeholders and clients to deliver robust, scalable software.

Web Developer | *Incuvius* 2011 – Sep 2013

- Built custom website features, interactive components, and database-driven backend services.
- Debugged, performance-optimized, and maintained production websites and client web portals.
- Supported frontend and backend engineering across multiple concurrent client engagements.

FEATURED PROJECTS

Dagango — *Multi-Tenant E-Commerce Platform* dagango.com →

Multi-tenant e-commerce platform built for independent merchants and modern dropshipping. Powers isolated merchant storefronts with host-based tenant resolution, dynamic OKLCH color token theming, sub-second product search, bulk CSV catalog operations, and automated SEO metadata generation. Architected a Next.js App Router frontend paired with FastAPI (Python 3.11) and PostgreSQL behind Cloudflare.

Tech Stack: *Next.js • FastAPI • Python • TypeScript • PostgreSQL • Tailwind CSS • Docker*

Kas Transparan — *Civic Treasury & Dues Management* kas.gba.web.id →

Open-source civic trust and neighborhood treasury system built for Indonesian RT/RW communities. Provides public financial transparency with no login required, self-check dues portal for residents, multi-month arrears detection, and batch payment processing. Multi-tenant FastAPI backend with 85+ Pytest tests, paired with React 19, TypeScript, and Tailwind CSS. Deployed to self-hosted Linux VPS.

Tech Stack: *FastAPI • Python • React • TypeScript • Tailwind CSS • SQLite • Nginx • Linux VPS*

GainForge — *Gamified Fitness RPG (Full-Stack Rust)* gainforgeapp.com →

Gamified fitness application turning real workouts into RPG quests with character stats (STR, END, AGI, FLX), leveling systems, and training schedules. Built solo end-to-end with a full Rust stack: Leptos (WASM) frontend and Axum backend sharing a single DTO crate, with PostgreSQL database, 15 migrations, and Docker deployment on VPS.

Tech Stack: *Rust • Leptos (WASM) • Axum • PostgreSQL • Docker • Linux VPS*

Cover Letter Generator — *AI-Powered Proposal & Cover Letter Tool* cover.aditf.com →

AI-driven cover letter generator featuring customizable user profiles, job description scraping, LLM API prompt pipelines, and an automated humanization pass that strips AI writing tells. Built with React, Vite, Tailwind CSS, Node.js/Express, and PostgreSQL with JWT authentication. Self-hosted via git-push post-receive hook and Nginx.

Tech Stack: *React • Vite • Node.js • Express • PostgreSQL • Tailwind CSS • Linux VPS*

CERTIFICATIONS & LANGUAGES

Certifications: JavaScript Course, CSS Fundamentals, jQuery Course

Languages: Indonesian: Native | English: Professional Working Proficiency
