ADITYA FIRMANSYAH

SENIOR FULL-STACK ENGINEER | NEXT.JS & NODE.JS | SAAS & SCALABLE APIS

Surakarta, Indonesia • Open to global remote • +62 811-201-7817 • aditf.work@gmail.com
aditf.com | linkedin.com/in/aditya-firmansyah-21940845 | github.com/adityafirmansyah

PROFESSIONAL PROFILE

Senior full-stack engineer with 13+ years delivering customer-facing platforms, multi-tenant commerce solutions, and scalable APIs. Specializes in Next.js, TypeScript, Node.js and production system architecture, with additional FastAPI expertise. Built software supporting cross-border logistics across APAC, optimized catalog queries by 11.6×, and helped reduce reported regression defects by over 40% through engineering quality improvements. Combines hands-on delivery with platform reliability, payment integrations, and technical leadership.

CORE TECHNICAL SKILLS

Frontend: Next.js (App Router), React, TypeScript, JavaScript, Tailwind CSS, responsive interfaces, web performance

Backend & APIs: Node.js, NestJS, REST, gRPC, FastAPI, SQLAlchemy, microservices, integration APIs

SaaS & Data: Multi-tenant architecture, PostgreSQL, MySQL, Redis, background jobs, payments, idempotency, database indexing

Platform & Delivery: Docker, Kubernetes, CI/CD, GitHub Actions, Linux, Nginx, Caddy, automated testing, TDD

PROFESSIONAL EXPERIENCE

Lead Architect & Founder — Dagango | ***Aug 2024 – Present*** | ***Surakarta, Indonesia***

- Delivered a multi-tenant e-commerce platform using Next.js, TypeScript, FastAPI and PostgreSQL, enabling separate storefront experiences on shared infrastructure through host-based tenant isolation.
- Improved the responsiveness of a 20,000+-item product catalog by optimizing PostgreSQL indexes and queries; reduced a measured lookup from 4.52 ms to 0.39 ms (11.6× faster).
- Built reliable bulk-import and payment-reconciliation workflows with Redis-backed jobs, transaction safeguards and idempotency controls, reducing the risk of partial catalog updates and duplicate payment processing.
- Owned deployment, backup, and monitoring-oriented operations on self-hosted Linux infrastructure, supporting reported availability of 99.9%+ for the platform.

Chief Technology Officer — GOSG Consulting | ***Aug 2024 – Jul 2026*** | ***Singapore (Remote)***

- Delivered commercial e-commerce and client platforms end-to-end with Next.js, TypeScript, Node.js and Medusa, connecting business requirements to production-ready storefront and backend functionality.
- Reduced reported regression defects by over 40% by introducing test-driven development, structured code reviews and automated CI quality checks, improving release confidence for client projects.
- Implemented application integrations and AI-assisted operational workflows to automate data enrichment and structured customer interactions; mentored developers and aligned technical delivery with client requirements.
- Maintained production deployments and reliability through automated releases, Linux administration and reverse-proxy configuration, supporting reported 99.9%+ availability.

Software Engineer — Pickupp | *Apr 2019 – Jul 2024* | *Singapore (Remote)*

- Delivered merchant, administration, fleet and delivery-agent applications supporting cross-border parcel operations across Singapore and APAC, equipping multiple operational teams with dedicated workflows.
- Developed TypeScript/gRPC microservices powering dispatch and route allocation during high-concurrency delivery peaks, supporting operational throughput and system scalability.
- Integrated external carrier APIs including UPS, enabling merchant shipping quotes, cross-border label generation and automated shipment-tracking updates.
- Supported reliable peak-season operations through Docker containerization and rolling Kubernetes deployments; standardized API contracts with distributed engineering teams.

Full-Stack Developer — WebDesignHamburg.net | *May 2018 – Apr 2019* | *Hamburg (Remote)*

- Shipped responsive commercial websites and client portals for European customers, turning business requirements into working interfaces backed by PHP/MySQL APIs.

Senior Web Application Developer / Web Developer — Incuvius | *2011 – May 2018* | *Indonesia*

- Contributed to delivery of 30+ client web projects, improving application responsiveness through MySQL query optimization and frontend troubleshooting while mentoring junior developers.

SELECTED PROJECTS

Dagango | dagango.com — Multi-tenant commerce with isolated storefronts, 20,000+-item catalog operations and resilient payment workflows; Next.js, TypeScript, FastAPI, PostgreSQL and Redis.

mycv.ai.id — Resume optimization application with an 8-stage processing pipeline, QRIS payment integration, PDF generation and multilayer request throttling; React/TypeScript and FastAPI.

TirtaDesa | tirtadesa.com — Offline-first meter-reading workflow allowing utility field officers to record usage without connectivity and sync later; IndexedDB, FastAPI and Bluetooth printing.

LANGUAGES & CREDENTIALS

English: Professional working proficiency | Indonesian: Native

Certifications listed in source CV: JavaScript Certified Professional; CSS Fundamentals; jQuery Advanced Architecture (issuers/dates not supplied).
