

ADITYA FIRMANSYAH

SENIOR SOFTWARE ENGINEER & FULL-STACK DEVELOPER

Surakarta, Central Java, ID +62 811-201-7817 aditf.work@gmail.com aditf.com linkedin.com/in/aditya-firmansyah-21940845

PROFESSIONAL SUMMARY

Software engineer with 13+ years designing and building scalable web, backend, and mobile applications. Experienced across the full development lifecycle with TypeScript, Python, React, Next.js, FastAPI, Node.js, and NestJS. Proven track record shipping enterprise logistics platforms, microservices, and cloud-native applications deployed on Kubernetes. As CTO of GOSG Consulting, leading e-commerce platforms and autonomous AI agent workflows. Strong advocate for clean architecture, code quality, and collaborative engineering.

PROFESSIONAL EXPERIENCE

Chief Technology Officer Aug 2024 – Present
GOSG Consulting

- Architects high-scale e-commerce platforms using Next.js App Router, FastAPI monorepos, and Medusa.
- Engineers autonomous AI agent pipelines with deterministic verification gates and background dispatch.
- Enforces RED-GREEN-REFACTOR TDD, zero-trust PR reviews, and automated CI quality gates.
- Designs resilient server and deployment infrastructure on self-hosted Linux VPS (Nginx, systemd, Caddy).

Next.js FastAPI Python TypeScript AI Agents PostgreSQL Linux VPS

Software Engineer Apr 2019 – Jul 2024
Pickupp (Singapore)

- Developed and maintained enterprise logistics platforms using React, Next.js, Node.js, and NestJS.
- Built scalable backend microservices in TypeScript communicating through gRPC.
- Integrated UPS shipping APIs to expand merchant delivery options and pricing capabilities.
- Contributed to Merchant Portal, Admin Portal, Fleet Portal, Landing Page, User App, and Delivery Agent App.
- Deployed and maintained services in Kubernetes environments supporting scalable production workloads.

React Next.js Node.js NestJS TypeScript gRPC Kubernetes

Full-Stack Developer May 2018 – Apr 2019
WebDesignHamburg.net

- Developed and maintained custom web applications for international clients with automated build pipelines.
- Implemented responsive frontend and backend features based on client business requirements.

Senior Web Application Developer Sep 2013 – May 2018
Incuvius

- Architected custom web applications and resolved complex technical bottlenecks for enterprise clients.
- Maintained existing applications while implementing new high-traffic modules and integrations.

Web Developer 2011 – Sep 2013
Incuvius

- Built custom website features, database-driven backend components, and maintained production websites.

FEATURED PROJECTS

Dagango — Multi-Tenant E-Commerce Platform dagango.com →
Next.js App Router + FastAPI monorepo with PostgreSQL tenant isolation, dynamic OKLCH color token theming, sub-second search, atomic CSV catalog pipelines, and automated SEO metadata generation.

Kas Transparan — Civic Treasury & Dues System kas.gba.web.id →
Open-source neighborhood treasury platform in FastAPI (85+ Pytest tests) & React 19 / TypeScript / Tailwind. Public financial transparency, sub-second dues lookup, self-hosted Linux VPS.

TECHNICAL SKILLS

LANGUAGES

JavaScript (ES6+), TypeScript, Python, HTML5, CSS3

FRONTEND

React, Next.js, React Native, Tailwind CSS, Vite

BACKEND

FastAPI, Node.js, NestJS, REST APIs, gRPC, Microservices

PLATFORM & AI

Autonomous AI Agents, E-commerce Systems, SEO Tooling

INFRASTRUCTURE

Kubernetes, Docker, Linux VPS, Git, CI/CD, Nginx, Caddy

DATABASES

PostgreSQL, MySQL, SQLite

CMS

WordPress, Shopify

PRACTICES

API Integration, Code Review, Agile Development, Software Architecture, TDD

CERTIFICATIONS

JavaScript Course

CSS Fundamentals

jQuery Course

LANGUAGES

Indonesian

Native

English

Professional Working Proficiency
