PROFESSIONAL SUMMARY

Software Engineer with 13+ years of experience designing and building scalable web, backend, and mobile applications. Experienced across the full software development lifecycle using React, Next.js, Node.js, NestJS, TypeScript, and WordPress. Proven expertise developing enterprise logistics platforms, microservices, API integrations, and cloud-native applications deployed on Kubernetes. Strong advocate of clean architecture, code quality, and collaborative engineering practices.

PROFESSIONAL EXPERIENCE

Chief Technology Officer

GOSG Consulting

Aug 2024 – Present

- Builds the product and designs the application architecture.
- Makes technical decisions and defines coding standards.
- Mentors other developers and helps turn business ideas into technical plans.
- Estimates timelines and technical risks, and manages server infrastructure.

Software Engineer

Pickupp (Singapore)

Apr 2019 – Jul 2024

- Developed and maintained enterprise logistics platforms using React, Next.js, Node.js, and NestJS.
- Built scalable backend microservices in TypeScript communicating through gRPC.
- Integrated UPS shipping APIs to expand merchant delivery options and pricing capabilities.
- Contributed to Merchant Portal, Admin Portal, Fleet Portal, Landing Page, User App, and Delivery Agent App.
- Participated in code reviews, improving maintainability and engineering quality.
- Deployed and maintained services in Kubernetes environments to support scalable production workloads.
